**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Priority*

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in the pending application.

### *Quayle Action*

2. This application is in condition for allowance except for the following formal matters:
  - The specification is objected to because of a "language" type error in the abstract of the disclosure (see below).
  - The drawings are objected to because of an absence of a Figure element description in the specification (see below).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

### *Specification*

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 2676

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract comprises of implied language as can be seen in the first sentence, "A color conversion apparatus and method is disclosed," (see line 1 of abstract). This sentence should be corrected.

### ***Drawings***

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: #5210 of Figure 3. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Allowable Subject Matter***

5. Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claims 1 and 6, the prior art of record (Shu et al. (U.S. Patent 6,400,843 B1) and Booth, Jr. (U.S. Publication 2003/0011613 A1)) does not explicitly disclose converting an input color signal into a WYV color signal for a first output and then converting the further processed WYV color signal into an XYZ color signal, in combination with the further limitations of claims 1 and 6 respectively.

In reference to claims 2-5 and 7-10, claims 2-5 and 7-10 depend upon allowable claims 1 and 6 respectively above and are therefore also deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *References Cited*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- a. Shu et al. (U.S. Patent 6,400,843 B1)
  - Shu et al. discloses a color image reproduction system improving the utilization of colors within the gamut of an output device that are not in the gamut of an input device.
- b. Booth, Jr. (U.S. Publication 2003/0011613 A1)
  - Booth, Jr. discloses a method and apparatus for wide gamut multicolor display adjusting.
